

## Welcome to the Enterprise In Space Education Team!

EIS is excited to have you come on board a fantastic program - to invigorate and engage teachers and students everywhere in space science and how it relates to the everyday world around us. EIS is on schedule to launch, orbit, and retrieve 100 + student experiments designed by students K-12+University from around the globe in 2020 or 2021. The orbiter is named the *NSS Enterprise* in homage to the great visionaries of science and science fiction.

The Education Team will demonstrate and pioneer new technologies while inspiring and encouraging space enterprise and I personally appreciate the energy and unique talents you are bringing into the program. Together we will change the world around us!

I invite you to take a look at the website [www.enterpriseinspace.org](http://www.enterpriseinspace.org)

which will give you an overview of the program and I would be pleased to discuss the EIS program with you. I look forward to getting to know you further and again, WELCOME! My contact information is found below.
